Subject: Microsoft

Hello,

I think this case has taken more time than it is worth. The facts are companies don't like Microsoft because they offer a superior product and they have there hands in everything. Microsoft offers a product that helps consumers get work done and that does not cost us an arm and a leg. That's why states like California (my home state) don't like it. Because the other companies cant make better products. Please once in for all protect all consumers and end this
